TAPELER™

applies

TAPELS*

only $29.95

*a tapel is a 1¼" length of pressure sensitive tape

ECONOMICAL: Saves tape — Tapeler pays for itself over and over again by eliminating excessive, random and extravagant use of tape — giving some customers up to 10 times more applications per cartridge. Research proves 1¼" length of tape is ideal for most uses. For that occasional longer tape requirement, apply tapel after tapel after tapel.

UNIVERSAL: Tapeler is simple to use, and once you know how, it becomes an indispensable tool. Applies a wide variety of tapes to most surfaces — neatly, with square corners. Hang information anywhere — on glass, stone, tile, cement, or metal surfaces. No more damaging thumbtacks or sloppy random lengths of tape. Your imagination is your only limitation. (See types and suggested uses on reverse side.)

EFFICIENT: Saves time — Tapeler measures, cuts and applies a piece of pressure sensitive tape in only ¼ second. It is an amazing labor saver and eliminates the handling of individual sticky pieces of tape. Also allows for hand placement when necessary.

REFILL CARTRIDGES: Contain 500 tapels per roll of paper tape, 1000 per roll of transparent tape. Easy to load. Available in a wide range of colors. Tapels come in three widths: ½", ⅝", and ¾" sizes.

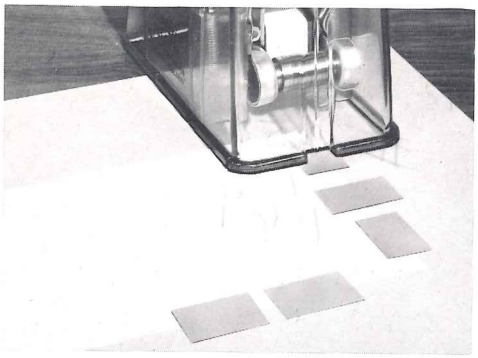
PLUS Only Tapeler automatically applies double-faced Tapels — PST's fastest growing area

Hidden Tapels (double-faced) hold and secure, are clean and unseen. They never tear, deface or touch the front of documents, posters, advertising, bulletins, photographs or artwork. In general, they attach anything to anything, with new uses being reported every day.

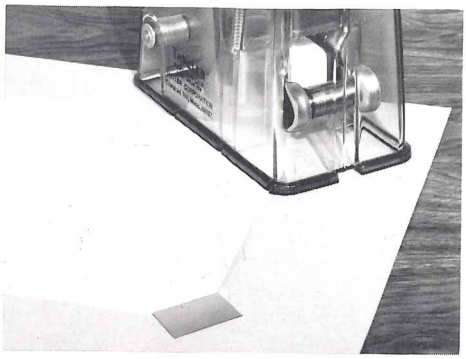
TAPELER™ CORPORATION

180 Needham Street • Newton, Mass. 02164 • Tel: 617-969-4610 • Cable "TAPELER"

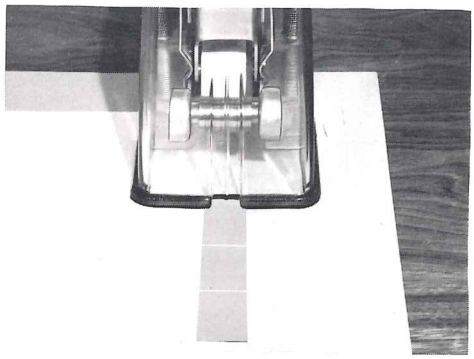
Learn to apply TAPELS in minutes. A practice cartridge is supplied with each Tapeler.



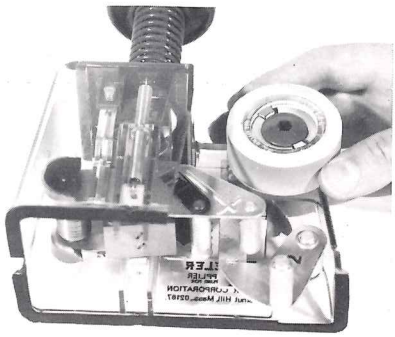
Horizontal & Vertical Placement

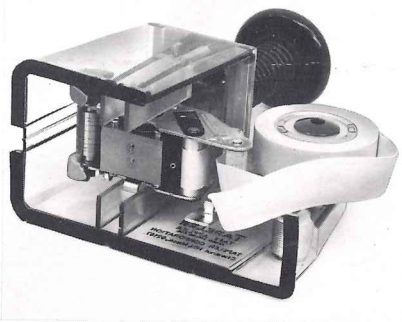


45° Placement



Endless Placement





Reload the TAPELER quickly. The best way is to attach the start of a new cartridge to the end of the tape about to run out.

TYPES OF TAPELS

(partial listing only — see your dealer for complete up to date listing)

No. 18010 General Purpose Tapels — For sealing; fastening; marking; splicing; bundling; water-proofing; protecting and drafting operations. Will not tear paper when lifted from drawing board.

No. 18020 Color Coding Tapels — For identifying; routing; decorating; color coding; holding and bundling. Especially good for pricing and inventory control. May be marked with pen, pencil or crayon.

No. 18030 Invisible Tapels – For mending and repairing papers, documents, blueprints; fastening bulletins, notices, instructions; sealing and packing boxes, bags, and envelopes; splicing; and you can write on them.

No. 18040 Clear Tapels — For laminating, protecting and repairing. May not be marked or written on. Strength and see-through ability are the important features.

No.18050 Freezer Tapels — For bundling, sealing and holding frozen packages. May be written on for identification purposes.

No. 18060 Linerless Clear Hidden Tapels — Double faced tape for securing one surface to another without a protective liner. A ready replacement for messy adhesives.

Tape styles 18010, 18020, 18050, (paper tapes) have 500 tapels per roll. Styles 18030, 18040, and 18060 (film tapes) contain 1000 tapels per roll. All types available in three widths: ½", ⅝", and ¾". For special tapes — write our application engineering department.

Warranted 90 days against manufacturing defects . . . *then for life* with a nominal charge for handling. See guarantee enclosed with each Tapeler.

* **TAPELER is patented/Patent Applied for in the major countries of the world.**
